Overview
CI Relationship Types
The possible types of relationships between configuration items are defined via the CI relationship types.
CI Categories, Types and Attributes
The CMDB data model is defined via the CI categories, types and attributes.
CI Attribute Groups
The groups for CI attributes to be assigned to are defined via the CI attribute groups.
CI Views
The attributes displayed in the detailed views of the different CI types can be positioned as desired via the CI views.
CI Life Cycle Models
The different phases and statuses are defined via the CI life cycle model and to which CI types it is applied.
Import
Data from other systems is connected via the import.
Mapping Templates
The mapping templates determine the mapping of data from other data sources to the CMDB data model.
Aliases
Lists all aliases used for the automatic naming of Configuration Items.
CI Locks
Reset CI Locks
